

TESTIMONIAL

This Clinical Arthroplasty Fellowship under ISKSAA under **Dr. Jatinder Singla** Sir at **Max Hospital, Mohali**, provided an outstanding and comprehensive learning experience in advanced knee replacement surgery.

The program is meticulously structured, offering deep exposure to the full spectrum of knee arthroplasty. I gained invaluable hands-on knowledge and insight into the nuances of **Total Knee Arthroplasty (TKA)**, the complexities of **Revision Knee Arthroplasty**, and the precise technique required for **Uni Knee Arthroplasty (UKA)**. Sir's approach emphasizes meticulous planning and flawless execution for all primary and complex revision cases.

Dr Singla Sir is a remarkably skilled and experienced surgeon. Watching him operate—whether in the outpatient clinic, theatre sessions, or while discussing patient management—demonstrated his surgical precision and discipline. Beyond the technical aspects, he was exceptional in guiding us on the principles of patient selection, pre-operative optimisation, and post-operative protocols, ensuring a holistic understanding of joint replacement care.

Sir's dedication to teaching is truly commendable. He maintained an incredibly welcoming and professional environment, ensuring all fellows were comfortable and engaged at all times. His discipline and focused approach to his work are inspiring, setting a high standard for patient care.

During the fellowship, we attended regular clinics and theatre sessions, seeing a high volume of patients. The experience offered an in-depth understanding of all topics, moving far beyond theoretical knowledge into practical, real-world applications.

I had a tremendous and immensely productive time during this fellowship in Mohali and would unequivocally recommend this program under Dr Jatinder Singla's guidance to any aspiring arthroplasty surgeon looking to master knee replacement techniques.

I am grateful to Dr Puspinder Bajaj, Dr Jatinder Singla, and the entire ISKSAA team for providing me with this great opportunity.

DR ARPIT SINGH
